

Site Registration is a fast and convenient way to facilitate your communication with First Solar.

Please fill out this document and send it with your signature back to First Solar to receive your personal Site Registration Number. This number helps us identify you as the Owner of First Solar modules and will thus speed up any future communication between you and First Solar.

By completing Section A (Basic Registration Information) of this document you will have provided the necessary information required to support First Solar's Module Collection and Recycling Program.

First Solar, as part of its commitment to improving the global environment, has established this Module Collection and Recycling Program to encourage the recovery and reuse of module materials. For each Module sold, First Solar sets aside sufficient funds to meet the estimated future costs of collecting and recycling Modules at the end of their useful life. Anyone possessing a Module can request collection and recycling at any time at no cost in accordance with this Program by contacting First Solar via:

- the Web: www.firstsolar.com/recycling
- email: recycling@firstsolar.com
- telephone
1.866.456.8938 (North American Toll Free)
+800.433.32.333* (International Freephone)

*For more details on dialling codes please visit First Solar's website.

The contact details are also provided on the label on the back of each module.

By completing Section B (Warranty Specific Information) you will have submitted all relevant information for possible warranty cases.

Please contact your module supplier for more information on the terms and conditions of First Solar warranties as well as the handling of warranty cases.

First Solar created the System Design Application (SDA) in order to support its customers in the development of optimal system designs. First Solar believes that superior performance of the system is achieved only by controlling the quality of the system design thereby providing reliable system performance for 25+ years. Please contact a First Solar partner or your module supplier for further information and technical assistance.

DISCLAIMER: This document only describes the purpose and background of a Site Registration and shall not be construed as an obligation, warranty or confirmation of any kind of First Solar Inc. or any of its affiliates.

First Solar encourages all Module Owners to complete Section A and B for faster processing of possible future Collection and Warranty Cases.

Section A: Basic Registration Information

This information will be completed by First Solar after the signed form is returned. A copy of this document will be provided together with the registration certificate.

Site Registration N°:

Signature Received Date:

Site Location:

Geographical or physical location of the First Solar modules

Address 1: _____

ZIP / City: _____

Address 2: _____

Country: _____

Module Owner Information:

Legal owner of the First Solar modules that are installed at the PV plant you are about to register

Contact

Company

Signature of this document acknowledges that you are aware of First Solar’s Module Collection and Recycling Program. This Program provides persons possessing Modules with information about the desirability of module recycling, the free of charge collection and recycling scheme available to them, and their role in contributing to the effective disposal of used Modules. (Document ID: PD-5-103).

In this regard you acknowledge that First Solar takes ownership of the module upon collection. Please ask your module supplier for this document or visit our website at: www.firstsolar.com/recycling

For reasons of contacting you, you agree to the storage of your contact details by First Solar.
